

QUICK START GUIDE

Apple HomeKit

INTEGRATION SUPPORT

THE SHADE STORE WIRELESS LINK OVERVIEW

Take your Automate experience to the next level by integrating The Shade Store motorized shades into Apple HomeKit control systems. The Shade Store Wireless Link is a rich integration that supports discreet shade control and features a two-way communication system offering real-time shade position and battery level status. The Shade Store Wireless Link supports Ethernet Cable (CAT 5) and Wireless Communication (2.4GHz) for home automation integration using the RJ45 port conveniently located on the back of the hub. Each hub can support integration of up to 30 shades.

ABOUT THE SHADE STORE WIRELESS LINK AND APPLE HOMEKIT

Your Shade Store Wireless Link just got smarter. Apple HomeKit works with The Shade Store Wireless Link to take control of your shades with your voice and Siri. All you need is The Shade Store Wireless Link and a compatible Siri device. This allows you to control individual or groups of shades with precision.

GETTING STARTED:

Go to the Apple Home App and add The Shade Store Wireless Link as an accessory. Proceed to pair Motorized shades through The Shade Store V2 App.

CONTROLLING YOUR SHADES THROUGH SIRI:

To create a seamless experience for handsfree voice activation, consider the natural way you and your family would call a shade on any Siri-enabled device. You may want to consider changing the name from Shade 1 to Living Room Shade in your The Shade Store V2 App.

SIRI COMMANDS

Siri understands natural spoken language like "open the blind" or even "replace the blind with shade"; Siri knows what you meant to say. Siri even understands commands like "open the blind a little bit" and even if you don't call it the exact name that's listed in the App, Siri will know what you meant. For example, if the name of the blind is "Kitchen" and the user says, "open the kitchen window", Siri will ignore the word "window". Below are the expected commands and responses from Siri.

Voice Command	Expected Shade Movement or response
Close/open <blinds name>	Shade will open/close to top or bottom limit
Close/open <room name> blinds/shades	Room will open/close to top or bottom limit (rooms are setup in the Home App)
Set <blinds names> to <percentage>	Shade will move to the called percentage (100% is open, 0% is closed)
Open/close<blinds names> to <percentage>	Shade will move to the called percentage (100% is open, 0% is closed)
Close/open <blinds name> <a little bit>	Shade will open or close 10% of the total limit to the direction of the called limit
Close/open <blinds names> halfway	Shade will move to 50% from top or bottom limit
Open/close blinds	All blinds in The Shade Store V2 App will follow the open or close command
Open/close shades	All shades in The Shade Store V2 App will follow the open or close command
Raise/lower blinds/shades	All blinds/shades in The Shade Store V2 App will follow the open or close command
Are <blinds name> open?	Siri will respond yes or no your blind is open or closed
What is the position of the <blinds name>?	Siri will respond the percentage of the blind position is X%
What is the battery percentage of the <blinds name>?	Siri will respond ether Critical or Normal, Normal is above 50%, Critical means recharge now

GROUP CONTROL:

Another method of operating window shades through HomeKit is through rooms. These rooms need to be setup in the Home app; rooms created in The Shade Store V2 App are not transferred over to Home app. Once a room has been created in the Home app, triggering it to operate, is it as simple as asking Siri to open or close that room.

PERCENTAGE CONTROL:

An individual window shade or group can be sent to any percentage of openness. The percentage will be based on the programmed limits on the motor. A shade that is completely raised to its upper limit is at 0%, while a shade that is completely lowered to its lower limit is at 100%. To move an individual shade only a little down, simply say "Siri close the shade a little bit."

TIPS:

Siri responds to names created in The Shade Store V2 App. Avoid using the words "blind" or "shade" in The Shade Store V2 App description. This will conflict when you say open all blinds. If you have changed the name of your shade in your The Shade Store V2 App, please ensure you force close The Shade Store V2 App, then re-open The Shade Store V2 App. Open the Apple Home app to check the names migrated to Apple Home.

The Shade Store Wireless Link – Apple HomeKit

Initial Setup:

<p>STEP 1</p>  <p>Open the "HomeKit" mobile App.</p>	<p>STEP 2</p>  <p>From the Home Screen, select "Add Accessory" at the icon of the page.</p>	<p>STEP 3</p>  <p>Scan the QR Code at the rear of the Hub, to synchronize with the HomeKit function of your Apple device.</p>	<p>STEP 4</p>  <p>Press the "Add to Home" button on the screen to proceed adding The Shade Store Wireless Link to the home app.</p>
<p>STEP 5</p>  <p>The Hub has been added on the HomeKit App.</p>	<p>STEP 6</p>  <p>Select a name for the Hub location and press the "continue" button to move forward with the configuration.</p>	<p>STEP 7</p>  <p>Confirm or edit the Hub name and press the "continue" button to move forward with the configuration.</p>	<p>STEP 8</p>  <p>Confirm the shade device and press the "continue" button to move forward with the configuration.</p>

STEP 9

Select a name for the Shade location and press the "continue" button to move forward with the configuration.

STEP 10

STEP 6

Select your HUB ID from the list and proceed with the pairing process.

STEP 7

Select your respective Time Zone and press "Next".

STEP 8

Press "Finish" to finalize the pairing process of your Hub using The Shade Store V2 App.

The Shade Store Wireless Link – Apple HomeKit

FREQUENTLY ASKED QUESTIONS

What Does "HomeKit" mean for The Shade Store Wireless Link?

The Shade Store Shades can be operated by talking to Siri in your home if you have The Shade Store Wireless Link connected to your Router via Lan or Wi-Fi and the free The Shade Store V2 App installed on an iOS device using iOS 11.3 or higher with Apple® HomeKit. Also, you can send the commands to your shade operating any HomeKit-enabled products outside the home. Talking to Siri requires 4th Generation Apple TV or Homepod. For more information on HomeKit, click: (<https://support.apple.com/en-us/HT204893>)

Can I control my shades via Siri from anywhere?

Siri will only operate the shades if you are connected via local Wi-Fi. Alternatively, you can set up a Home Pod, Apple TV or iPad as a home hub to grant you access to remotely control your HomeKit devices.

What Apple hardware/software is required for HomeKit?

An iPhone®, iPad®, or iPod® touch with iOS 11.3 or later is required for HomeKit. You can check your iOS version in Settings > General > About > Version.

For remote access, you'll need to have a third generation or later Apple TV with software version 7.0 or later in your home or a Homepod Device. Follow the steps here to make sure you have a supported Apple TV or Homepod: <https://support.apple.com/en-us/HT200008> or <https://www.apple.com/homepod/>

Remote access through Apple TV may require you to log out of iCloud® and log back in on your Apple TV.

Tip: Siri® will be more responsive if you set the "Sleep After" setting to "Never" in Settings.

If you have any other issues setting up Apple TV, please contact Apple Customer Support.

What Shade Store hardware/software is required for HomeKit?

The Shade Store Wireless Link (MT02-0401-067001) is required, as well as the latest version of iOS The Shade Store V2 App.

Note: The Shade Store V1 Hub (MTRF-WIFIBRIDGE-KIT) does not support HomeKit. Except for HomeKit support, all other features remain identical for generation 1 and generation 2.

Does The Shade Store Wireless Link with HomeKit features work with non-Apple smartphones and tablets (e.g. Android™)?

The Shade Store V2 App for The Shade Store Wireless Link is available for Android. However, Android devices do not have Siri and do not support third-party HomeKit apps. All The Shade Store Wireless Link (generation 1 and 2) have identical performance on Android.

Can everyone in the home use Siri from their own iOS device?

Using the HomeKit App, you can share control with family and friends and get notifications about the activity in your home so you never miss a thing. For more information on HomeKit click: <https://support.apple.com/en-us/HT204893>

Finding the Apple Home app on iPhone OS 12.4.3 or below.

If The Shade Store V2 App fails or displays an error message, there is an issue with connecting your Hub with HomeKit.

Removing The Shade Store Wireless Link Hub from HomeKit

Please ensure your hub is removed from the Home App and try again. Go to the Home App on your iOS device, select the house icon in the upper left corner of the home screen > Home Settings > Hub Location > Remove Home. Then Go back to The Shade Store V2 App and start from the beginning.

<p>STEP 1</p>  <p>Spinner in this message</p>	<p>STEP 2</p>  <p>Select "Home" icon in the top left and select "Home Settings".</p>	<p>STEP 3</p>  <p>Select "Hubs & Bridges" on the list and select the RA-Pulse- XXXX device to be deleted.</p>	<p>STEP 4</p>  <p>Press "Remove" button on the screen to delete The Shade Store Wireless Link.</p>
--	---	---	---

If you want to start from the beginning, please ensure that you are pressing the "P" button on the back of the Hub to re-pair it either from The Shade Store V2 App or from Home App.

STEP 5

After you remove The Shade Store Wireless Link from Home App, press and hold the "P" button on the back of the Hub until the LED becomes green. Then, release the button. To get the Hub on pairing mode to repeat the pairing process.

Where is the HomeKit QR Code Located on The Shade Store Wireless Link?

The HomeKit QR code is located on the bottom of the hub. *The house icon in the top left of the QR code represents the Home app for HomeKit.

STEP 1

After removing The Shade Store Wireless Link from Home App, press and hold the "P" button on the back of the Hub until the LED becomes green. Then, release the button. To get the Hub on pairing mode to repeat the pairing process.

The HomeKit QR code is on the bottom of The Shade Store Wireless Link.

STEP 2

Scan the QR Code at the rear of the Hub to synchronize with the HomeKit function of your Apple device.

STEP 3

Press the "Add to Home" button on the screen to proceed adding The Shade Store Wireless Link to the Home App.

STEP 4

The Hub is ready to be used. Press "continue" to start using the HomeKit app to control shades.

If the QR scan fails, you will be prompted to enter the setup up code. This code is the eight-digit number located in the top right of the QR code.

STEP 1

If you are unable to scan the HomeKit QR Code, press "I Don't Have a Code or Cannot Scan" to add it manually.

STEP 2

If your device is still not showing up on the list, press "My Accessory Isn't Shown Here" to move to the next step.

STEP 3

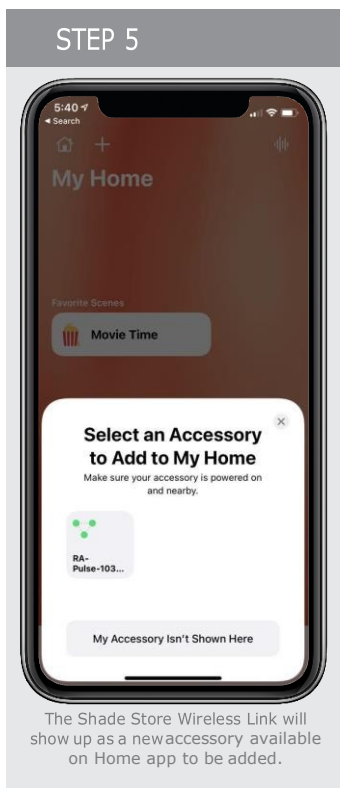

On the Home App screen, select "Enter Code" to enter it manually.

STEP 4

Type the HomeKit Setup Code available on the label on the bottom of The Shade Store Wireless Link.

The Shade Store Wireless Link will show up as a new accessory available on Home app to be added.

Select The Shade Store Wireless Link and wait until the Home App complete the process to add the Hub into it.

How do I know if my phone or device is connected to a 2.4Ghz or 5Ghz?

When you use the HomeKit QR code to pair The Shade Store Wireless Link, the app shows you if you are connected to the proper network.

Use Home App to confirm if your device is connected to the 2.4Ghz network.
