

# How to charge your TSS Battery Motor

Shades that need to be charged will beep 10 times. Battery level can be checked via remote control battery check function and Premium Motors will also show battery level via the TSS V2 App. See Page 2 for details.

## STEP 1

Rotate cover cap to expose motor head & charging port

\* Port may be oriented downward

## STEP 2

Find nearest power source and plug in charger (use an extension cord if required)

## STEP 3

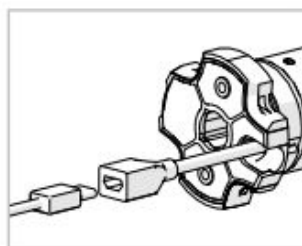

Plug micro USB end into the motor

- Observe the green light flashing and charge until the green light goes solid green
- Please note this may take up to eight hours

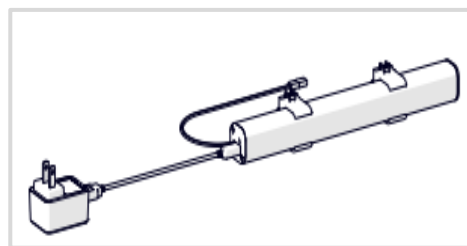

## STEP 4

Unplug and return cover cap to conceal motor head

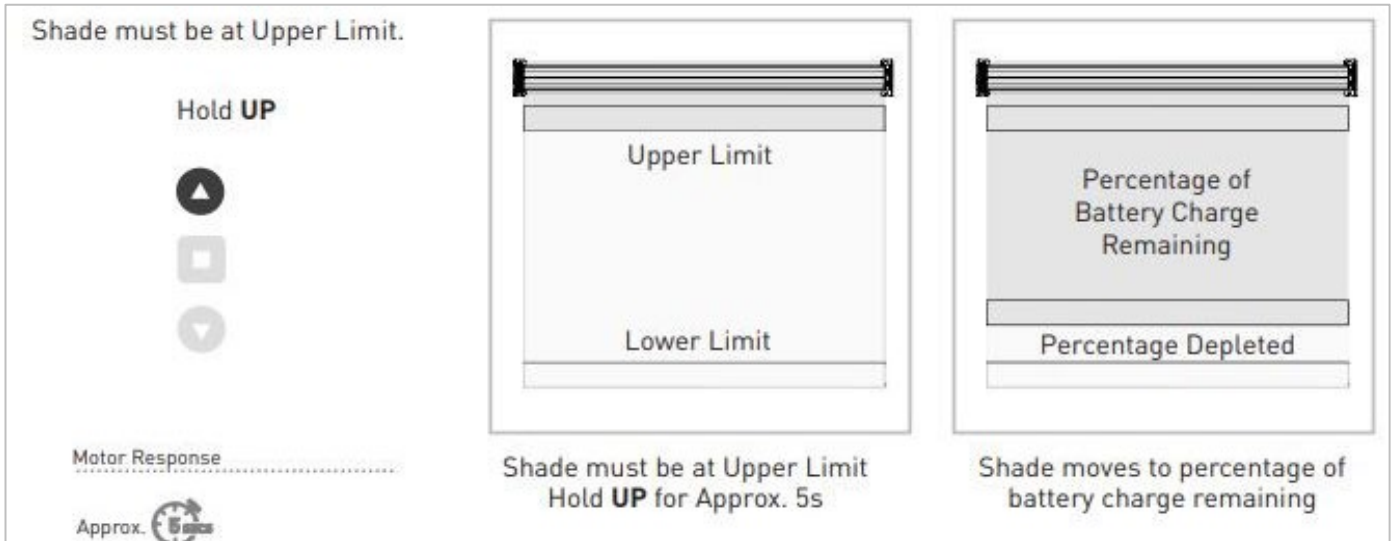

The Charging Port for some Roller, Roman, Woven Wood motors (35mm & 45mm options) is located on a short cord attached to the motor.

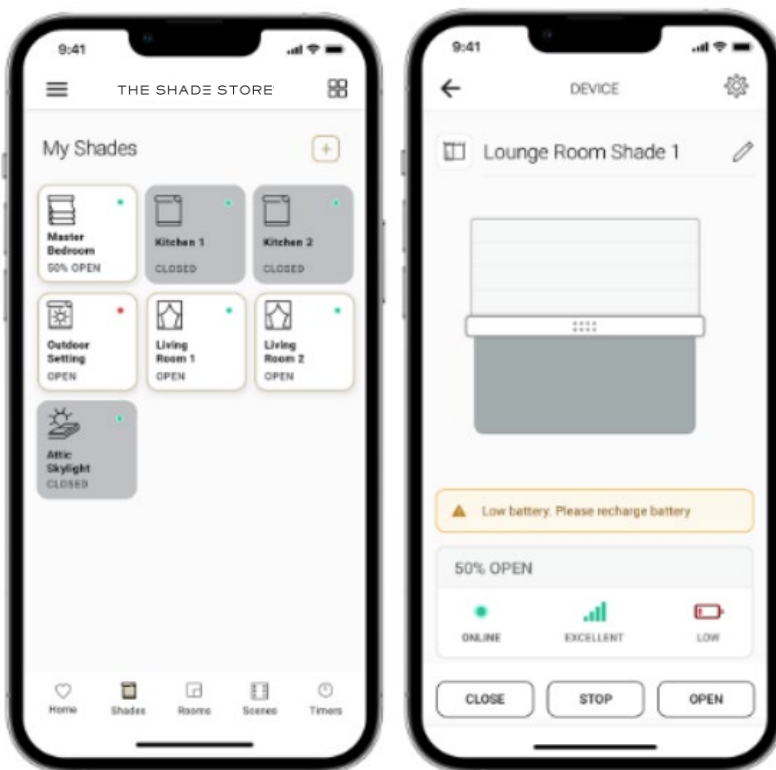

The Charging Port for Cellular Shades and Wood Blind Tilt-Only motors is located on the battery pack, next to the antenna.

# Additional Charging Information

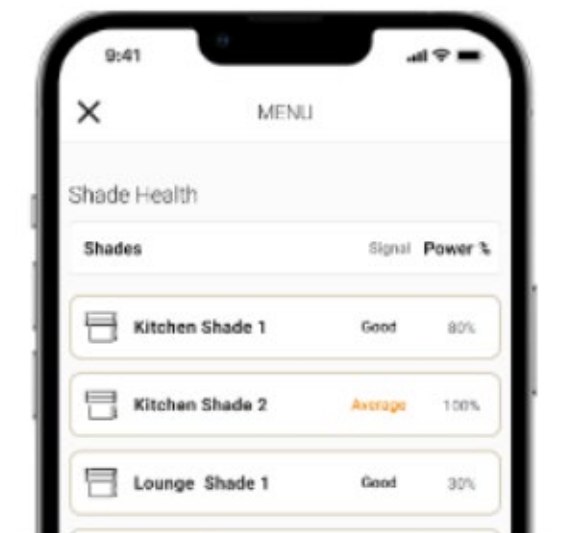

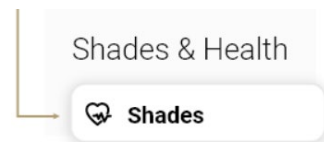

## Remote Battery Check Function

## App Battery Status Indicators

On the Menu, under Shades & Health, the Shades screen displays all your Shades' signal strength and battery percentage.

On the Home screen, a red light indicates either a device is offline, has poor signal strength, or the shade has a low battery.

A single long press will take you to the individual Shade screen for a more in-depth review.
